## Magazine Collage

Collages are works of art made by adhering various materials such as photographs and pieces of paper or fabric onto a backing. Collages can be simple to make with the help little creativity and a magazine or two.

### Supplies

- Paper
- Magazine(s)
- Glue stick
- Scissors
- Markers – optional

### Directions

1. Gather your supplies.
2. Start looking through your magazine(s) and cut out any images that you may want to put in your collage.
3. When you feel like you have enough images, start laying them out on your sheet of paper in an arrangement you like. We recommend overlapping and using contrasting images together for an interesting collage. Use as many or as few images as you'd like.
4. Once the images are where you want them, begin gluing them down with a glue stick, making sure to press down the edges.
5. Let glue dry.
6. When the glue is dry, you can choose to add drawings and embellishments with a marker or another drawing tool. If you'd like, glue on found objects or other materials to add interest.
7. Enjoy your finished collage!
