## Stained Glass Sidewalk Chalk Art

Creating art with sidewalk chalk is a great way to create street art, murals, and have fun outside in the summer! This is an easy technique to create an eye-catching, stained glass effect on the pavement.

### Supplies

- Sidewalk chalk
- Masking tape

### Directions

1. To begin, find a piece of sidewalk or driveway to create your work of art. It is easiest to find an existing tile of sidewalk within which to work, or tape off a square or rectangular section.
2. With your masking tape, tape down straight lines inside your section of sidewalk.
3. Continue using the masking tape to section off parts of the sidewalk, creating many shapes.
4. When you decide you have created enough sections with the masking tape, begin coloring each shape or section with a different color of chalk. Use many different colors for the best effect. If you'd like, you can blend the color into the sidewalk with your hands for a more solid color.
5. Once all of the sections are colored in, carefully pull up the masking tape.
6. Enjoy your stunning stained glass section of sidewalk!
